

**SCIENTISTS  
IN SCHOOL**

## COMMUNITY WORKSHOP PROGRAM

FOR THE CITY OF GUELPH, PEEL, HALTON AND WATERLOO REGIONS

### OUR SCIENCE WORKSHOPS ARE FUN AND EDUCATIONAL!

Our community workshops take science out of the classroom and into community settings such as summer camps, daycares, after-school programs and libraries. Our presenters bring subject expertise, discovery-based learning methodologies, and specialized materials to every workshop, creating a fun and hands-on experience for every child.

### WHAT YOU NEED TO KNOW

Topics: See a list of topics on the back  
Ages: 3-12 years old  
Length: 60-90 minutes  
Group size: Up to 25 children  
Cost: \$160

### BOOK YOUR WORKSHOP TODAY

Email: [wco@scientistsinschool.ca](mailto:wco@scientistsinschool.ca) with your workshop choice(s), contact information, preferred date(s), time(s), and location(s)

Call: 519-763-3950/1-855-900-3950 for more information.  
Note: Online booking is not available

Scientists in School™ is a leading Canadian charity dedicated to sparking children's interest in science, technology, engineering, math, and the environment through hands-on, discovery-based learning. With Scientists in School, kids become the scientists.

# SCIENTISTS IN SCHOOL

## COMMUNITY WORKSHOP PROGRAM

### Catch Me If You Can

7-12 years

Do you have what it takes to be Sherlock Holmes? Test your powers of observation and deduction as you use forensic science to solve the mystery of the missing munchies. Fingerprints, footprints, and invisible ink – oh my!

### Colour Me Curious

3-7 or 7-12 years

Colour is everywhere and without it the world would be a very dull place. Use colour to watch water defy gravity, explore rainbows and create a colourful exploding concoction. Curious? Come and explore some colourful science!

### Good Clean Fun!

3-7 or 7-12 years

Fun with soap and water? You'll be amazed when you make fireworks in a cup, explore surface tension and make your own soapy work of art. Explore millions of bubbles and make your own bath bomb to take home!

### Movin' and Groovin'

3-7 years

You can roll, you can tumble, you can slide, you can fumble, but you cannot hide from movement! Explore how everything around us moves in some way, even you! Jump like a flea, fly a paper helicopter and race a water bubble to the finish line. Have fun getting things moving and grooving!

### Obey Newton: It's the Law!

3-7 or 7-12 years

Sir Isaac Newton was one smart dude. Explore Newton's Laws of Motion as you learn how everything around us moves in some way but also likes to stay put, and how your actions always produce a reaction. Race a waterdrop to the finish line and discover the effects of gravity on your very own Tumble Bunny!

### Please Play with your Food!

3-7 or 7-12 years

Learning chemistry is fun when it's all about food! Make elephant toothpaste from kitchen chemicals. Explore solubility while experimenting with sweet treats. Create art using chemistry and watch it explode! Have fun making a suspension you can mold.

### The Planet Digs Bugs

3-7 years

They may be tiny, but more insects inhabit the planet than people. Get an up close look at these fascinating creatures by examining a praying mantis and a variety of dragonflies and butterflies. Both outdoor and indoor explorations are available.

If you'd like to book a community workshop for your group, camp, or organization, please send the following information to us via email: [wco@scientistsinschool.ca](mailto:wco@scientistsinschool.ca), or by mail: Scientists in School, 31 Queen Street, Morriston, Ontario N0B 2C0.
