We thank all candidates for their interest. Only those selected for an interview will be contacted. Scientists in School welcomes diversity in the workplace and encourages applications from all qualified individuals. Individuals with a disability requiring accommodation during the application and/or the interview process should advise us so arrangements can be made.

Position Summary:

Scientists in School has been delivering STEM workshops in classrooms for over 30 years. We are now offering virtual workshops in school and community settings and require Materials Packers to assemble individual mini science bags for students to use during the virtual workshops. The bags will be assembled and labeled at our Pickering office in accordance with Scientists in School's COVID -19 Protocols.

Responsibilities:

- Build individual student mini science bags for virtual science workshops

Qualifications:

- Ability to assemble materials into bags ensuring accuracy
- Ability to complete bags including labeling efficiently, meeting time guidelines
- Can work both independently and cooperatively as part of a team
- Reliable
- Good communication skills

Additional Requirements:

- Ability to lift and carry 22 kg
